

ARE PROUD SUPPORTERS OF

Wet Nose Animal Rescue Centre

Wet Nose Animal Rescue Centre is a “Right to Life” animal shelter which was started in 1999, with the aim of giving abandoned, abused and neglected animals a second chance. Animals in their care are not put to sleep, but looked after, fed, medicated and loved until a new loving home is found for them; no matter how long it takes!

Wet Nose Animal Rescue Centre receives NO government funding and relies solely on public donations to continue saving and re-homing animals on a daily basis. Many of the animals at Wet Nose have been hurt by their experiences, so the staff often has to spend time helping them overcome the problems they’ve developed as a result of abuse.

The Wet Nose vets treat animals against disease and sterilise all the animals in order to prevent indiscriminate breeding. Kennel hands provide everything from meals to cuddles, and their many volunteers take the dogs for long walks!

Wet Nose is a temporary home to between 200 and 300 dogs, 60 cats as well as a few horses, donkeys, goats and other farm animals. They really have their hands full!

WHAT DO WET NOSE SAY ABOUT OUR FOOD???

I was called out to help a dog and her Puppies in Bronkhorstspuit. The puppies were six weeks old and were not being looked after. The Mom and pups were loaded up and taken to the shelter so that they could be cared for and new homes could be found for them all.

The puppies were showing visible signs of malnutrition. This is easy to see in puppies as their legs grow crooked. This is what is known as Ricketts. The puppies had been at Wet Nose for about three weeks when a large donation of Puppy Food came in from Complete.

I immediately changed the puppies diet to the Complete Puppy Food. I was amazed to see how fast their legs started to straighten up. Within three days all the visible signs of rickets had disappeared. They had picked up weight beautifully and their condition had improved a lot.

I think that Complete Puppy Food is amazing, as it takes a food very high in nutritional value to correct the damage that malnutrition can cause. I would highly recommend Complete Puppy Food.
